

Seed series

Designed by Hans Thyge & Co, Denmark

The Seed chairs are tailored to your needs and can be beautifully adapted to all settings – from home offices and dining rooms to professional markets. Made from 85% recycled plastic, the poetic shape is designed to embrace you with exceptional comfort and support. During the moulding process, where waste plastic is converted into the shape, it creates a subtle interplay of colours, which makes each individual shell completely unique. Choose the frame type that best suits your needs, or the upholstered version in your preferred upholstery fabric and colour. The possibilities are endless.

Meet the designer

Hans Thyge & Co consists of passionate designers with strong ideas and a love for beautiful design. Together we work with a combination of a strong tradition and a drive to explore the unknown and innovative parts of design. The design studio specializes in designing furniture, objects and interiors. We juggle with everything from technical projects and lifestyle concepts to branding and communication and always with a strategic, sustainable and commercial approach in mind. We have a long history of know-how and experience working with a variety of materials and production methods for clients worldwide. Working with many nationalities and different design approaches worldwide, demands an attitude of openness and collaborative skills. The mixture of different cultures and design-traditions is the hot-spot where great design comes to life. We believe in combining brain and heart, function and aesthetics, and that every design should tell a story; a product is so much more than the product itself, it is about creativity, vision, culture, company values, the past, the present and the future.
