

**BIA**

Executive chair

**FREZZA**

**TECHNICAL DETAILS**

design J. Bennett & G. Ingignoli

backrest	in cold-foamed polyurethane, flexible (65 kg/m <sup>3</sup> ), fire-retardant, CFC-free, with steel insert. Available in high and medium versions.
seat	pressed metal sheet with fire-retardant, CFC-free flexible polyurethane padding; polypropylene under-seat cover.
armrests	pressure die-cast <u>aluminium</u> armrests, closed type, trapezoidal, linked to the backrest. Aluminium parts are available with a polished or black painted finish.
device	<u>self-calibrating synchronised device with 3-position</u> . Tilting angles: 18° backrest, 1° seat; starting position of the seat: 1.5° backwards. This device automatically adapts to the user's weight without requiring any operation. The backrest's tilt resistance is proportional to the weight placed on the seat.

Height adjustment	by gas lift with integrated lever under the seat. Allows a 11 cm excursion.
base	<u>5-star base</u> in polished aluminium or black epoxy powder coating. Self-locking, dual-tread, rubbered, swivel castors (Ø 60 mm for polished base, Ø 65 mm for black painted base).

ergonomics

Bia is equipped with the necessary mechanisms for proper and comfortable use, even for prolonged periods, as long as the following conditions are met: the standard sitting position requires maintaining angles of 90° between torso and thigh, between thigh and leg, and between leg and foot. These last two angles are essential so that the foot, resting completely on the surface below, discharges part of the weight of the lower limb onto it, preventing excessive compression on the back thigh surface and promoting blood circulation to the heart.
